

MedicsPremier™ for Ophthalmology:

Real World Class Ophthalmology Practice Management Automation

The financial, business, and operational needs of your Ophthalmology practice are too critically important for just any practice management software system.

Here's why your PM system should be MedicsPremier for Ophthalmology:

Stability: MedicsPremier is a solidly time-tested system with a provenance of almost forty years in the industry.

Power and Comprehensiveness:

- The system is used by Ophthalmology practices of every size and scope to handle their PM needs.
- The system handles Ophthalmology-specific billing needs including insurance billing for lenses and frames.

Functionality: ADS' own WindowOne™ architecture places needed data at the user's fingertips in virtually every window view within the system.

Reliability: MedicsPremier consistently ranks among the highest - if not the highest - in first time claims submissions.

Real Timeliness: MedicsPremier operates in real time:

- Newly input data / edits / payments, etc. are seen across the enterprise by all authorized users, as they happen.
- "Closes" are not needed in order to update the entire system with edits made that day.

Versatility: MedicsPremier can be implemented in the format that works best for you, not us!

- Cloud / ASP: MedicsPremier resides on remote servers and is accessed securely over the internet; the client does not need a server at the practice.
- Customer hosted (client server): MedicsPremier resides on a server located at the practice.
- Can be integrated with Ophthalmology-specific EHRs .

Entities: MedicsPremier is famous for the way in which it handles separate tax IDs for Ophthalmology practices needing this type of functionality. Patients are securely segregated by tax ID ensuring their integrity, yet the system's Entity architecture allows for very easy maneuvering between Entities when needed.

Your System / Your Way: Use MedicsPremier the way you want, not the way we want!

- Powerful, user-defined capabilities throughout MedicsPremier
- Personalized views and data displays
- User preference for icons, color codings, reports, and more
- Practice Administrator can control the extent to which each user can personalize their views

Cash Flow Maximized: Claims submitted in calendar year 2013 had an astounding first time success rate of 98.3% as reported by HFMA...as close to 100% as can be found anywhere, and with similar year to date statistics for 2014.

Cash Flow Optimized: Built-in, real time Medics Claims Denial Manager for the handful of claims that are denied:

- Claims are displayed with denial details
- Corrections are made from that view
- Claims are resubmitted “on the fly” from that same window
- Even denied claims are capitalized on as quickly as possible in MedicsPremier!

Anticipatory Reimbursement Management: Take a very proactive approach to pending claims by viewing their real-time status in the payers’ queues, similar to tracking a FedEx™ or UPS™ package. Get an up-to-the minute view of your unpaid claims as often as you want, and have a real handle on when they can be expected to arrive.

Future-Ready Now: Built-in Medics ICD-10 Code Converter takes Ophthalmology ICD-9 codes and displays their ICD-10 equivalents in easy-to-use drop down format for quick selection for correct coding.

Work Smarter, Not Harder: Highly intelligent MedicsPremier Billing, Accounts Receivable and Collections Management for payers and patients.

- Manage insurance receivables according to individual payers’ general “turnaround” times.
- Collection efforts are managed smarter by being more personalized to payment schedules.
- Prevents time wasted when using the more rigid 30-60-90 day format for collections.
- A/R reports can show “raw” amounts due as well as the actual amounts that can be expected.
- Automated cascading of payers for patients with multiple insurance coverage.
- Patient receivables can be worked differently with a “number of statements” vs. 30-60-90.
- Patient-due amount is current from the day the balance becomes the patient’s responsibility.
- Patient statements can be automated offsite with ExpressBill™.
- e-Statements are also available making the entire patient statement process paperless, with patient’s able to pay securely online directly through the statement itself.

EDI: Every Day Intelligence for Ophthalmology: with tens of millions of transactions processed annually in MedicsPremier:

- Unlimited claims to Medicare, Medicaid, and to hundreds of commercial payers.
- Unlimited ability to verify patients’ insurance and check for insurance company requirements in batch mode through the scheduler, individually, or both.
- Unlimited automated payment posting of EOBs.

Data Driven Details: MedicsPremier comes with a built-in array of Financial and Management Reports to really help manage the Ophthalmology practice:

- Highly customizable without requiring expensive add on utilities such as Crystal Reports™
- Data can be drilled-into for details which can then also be edited from that view
- Reports are easily exported to Excel™
- Users can schedule reports to compile at pre-defined times
- Report data can be highlighted with color coding / color fonts

Ophthalmology-Specific Appointment Scheduler: A management tool that also schedules appointments for patients!

- Workflow capabilities to keep traffic moving in the practice.
- Pinpoints bottlenecks and identifies how they are caused.
- Multi-level scheduling for practices requiring more than one type of encounter per overall visit
- Schedule resources, specific pieces of Ophthalmologic equipment, special exam rooms, etc. based on visit type.
- User-defined views, windows, color coding, radio buttons, and more.
- Reports related to scheduling (no-shows, cancellations, reschedules, appointment types, resources, appointments by provider, etc.).
- Scheduler-produced reminders and / or ability to integrate with patient communication systems
- View messages and balances due related to appointments
- Keeps track of number of allowable appointments based on reason and insurance

For Your Added Practice Management Pleasure! In addition to all of the integral features and capabilities provided with MedicsPremier for Ophthalmology, more can be added as needed:

- Medics OnCall™ “App” for remote connectivity using an internet-enabled smartphone. View patient information, schedule appointments, post procedures and diagnoses.
- MedicsScan™ for attaching letters, IDs, drivers’ licenses, insurance cards, etc. to the patient’s MedicsPremier account for quick retrieval, viewing, and printing if needed.
- MedicsCollections™ for Ophthalmology practices with high volume collections needing collection agency-type power.
- TransFirst™ for integrated credit and debit card payments, payment by check, and automated funds transfers. Excellent for accepting in-office copayments or outstanding balances.
