

Medics Claims Denial Manager:

Deny Your Denials!

You submit a claim, all appears to be fine, no indication of any problem, and then THUMP...it's been denied by the payer.

Without a doubt, managing denied claims is one of the biggest annoyances facing medical practices and revenue cycle management (RCM) companies.

Wouldn't it be great to have a way of immediately knowing if any of your submitted claims have been denied, "tweak" them, and resubmit instantly?

With Medics Claims Denial Manager from ADS, you can!

Using Medics Claims Denial Manager, the practice can easily view its denied claims, assess the reason(s) for being denied, make the corrections, resubmit, and obtain reimbursement as quickly as possible.

Medics Claims Denial Manager creates love / hate relationships: payers hate it, practices and RCM companies love it.

Contact ADS for more information on Medics Claims Denial Manager and how it can keep all of your claims in your payers' "Pay" files!
