MedicsRx™ e-Prescribing Solution
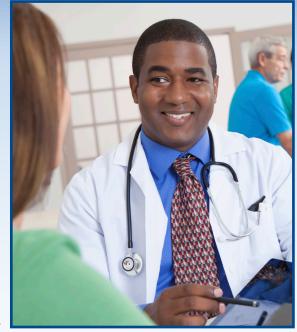

MedicsRx improves patient care and practice efficiency by combining the robust features of comprehensive prescription and medication management along with the ability to electronically transmit prescriptions directly to the patient's pharmacy.

The need for handwritten prescriptions and the numerous problems they present are eliminated with MedicsRx.

Comprehensive features include:

- Automatically retain each patient's prescription data for easy look-up

- Transmit prescriptions directly to the patient's pharmacy, including those for **controlled substances** in states allowing for that

- Quick completion of refill requests

- Comprehensive drug information instantaneously available: medications, allergies and formularies

- Providers can create their own "favorites" list of medications

- Eliminate: lost paper prescriptions, illegible handwriting, out-of-formulary medications for that patient

- Greatly reduce if not completely eliminate phone time with pharmacists

MedicsRx is a built-in feature within the MedicsDocAssistant EHR. The ability to handle electronic prescribing capabilities (via SureScripts™) is easily enabled for practices wanting this type of functionality.

Visit us at **www.adsc.com** for a short presentation of MedicsRx, along with all of the other features and benefits provided by our Medics Solutions Suite.
