Revenue Cycle Management Companies and ADS: A Spectrum of Synchronized Solutions and Systems

Revenue Cycle Management (RCM) companies, from those processing claims for two or three providers to those processing for hundreds of providers, and from single specialties to multiple specialties rely on automation solutions from Advanced Data Systems (ADS).

For more than 30 years, ADS has been providing robust systems to RCM companies for billing, EDI, patient statements, reporting, A/R, and collections. Today, RCM companies are processing **millions of claims** annually for their clients through systems from ADS.

It is not by accident that so many RCM companies look to our solutions for their clients:

- MedicsPremier is **5010 compliant**, with **ICD-10** compliance to follow.
- Our **MedicsPremier Practice Management system** is incredibly comprehensive, yet amazingly easy to learn and use.
- MedicsPremier uses a **Master Patient Index (MPI)** making it easy and reliable to identify patients across the enterprise.
- MedicsPremier's architecture is extraordinary for RCM companies in how it **securely and safely handles multiple Tax IDs through our HIPAA-compliant Entities**. Entities prevent the inadvertent mixing of patients' data into incorrect provider profiles, and from providers accessing patient information which is not theirs to access.

- Users can move between Entities **without having to constantly logout of one before logging into another** (a common nuisance with other systems).
- **Patient data from one Entity can be easily inserted into another Entity** should that patient now become the patient of another provider who also has an Entity on the system. This eliminates the need to manually re-enter that patient's demographics (another common nuisance with other systems).
- In addition to Entities, MedicsPremier **Directories** are also available for even greater "separation security." Directories are excellent for RCM companies with clients having multiple locations or different corporate names. Directories act as almost completely separate copies of the MedicsPremier software.
- MedicsPremier handles virtually **every type of billing for every type of primary care or specialty** including anesthesia, radiology, behavioral health, UB, Workers Comp, and No-Fault.
- Financial reporting in MedicsPremier is comprehensive and robust, with a **library of built-in reports** that are incredibly easy to configure, and which are highly user-defined. The ability to produce an array of invaluable reports for your clients reinforces the concept of you being a **fully functional RCM company and not merely "just another billing service."** MedicsPremier does **not require expensive, add-on report writer utilities**.
- The RCM company's clients can be remote users on the RCM company's MedicsPremier system, with **capability levels as defined by the RCM company**.
- Clients of the RCM company can also have system access with our **Medics On-Call™ for iPhone™, Droid™, and other internet-enabled smart phones and handhelds**. This is excellent for hospital rounds or for general remote connectivity.
- The built-in **MedicsPremier Audit Trail automatically tracks system activity by user**. The Audit Trail tracks systems usage by user, whether the user is on the RCM company's side, or on the client's side.
- MedicsPremier **EDI provides for claims to Medicare, Medicaid and to hundreds of commercial carriers**, as well as **automated reconciliation, insurance verification, and claim tracking**.

(over)

(continued)

- The very dynamic **MedicsPremier Appointment Scheduler** is available to RCM companies that want to make appointment scheduling accessible to their clients.
- RCM companies can take advantage of **offsite patient statement production services** offering a quick and seamless fulfillment of patient statements for pennies more than the postage.
- Our **MedicsDocAssistant EHR** can be made available to the RCM company's clients who want EHR. The EHR is then integrated seamlessly with the RCM company's MedicsPremier PM system.
- MedicsDocAssistant V.5.2 is **2011/2012 ONC-ATCB certified by CCHIT® as a complete EHR for Stage 1 Meaningful Use**. This means the RCM company's clients **can take advantage of their Stimulus Act incentives** by using the MedicsDocAssistant EHR.
- The MedicsDocAssistant EHR's **electronic superbill enables the providers at your clients' practices to post procedures and diagnoses into the system during the encounter**. In turn, this data **flows directly to the patient's billing profile in the RCM company's MedicsPremier PM system**. This makes for an incredibly easy, logical and dynamic solution to the conundrum of how RCM companies can best capture their clients' billing data for processing. **Essentially, users are entering their billing data for you, as it happens!**
- **MedicsPortal**, an optional feature available with the MedicsDocAssistant EHR, will give your clients' patients the capability to connect with the practice for appointment scheduling, completing of "paperwork" in advance of their appointments, the ability to lookup information, to securely send and receive messages to and from the practice, and so much more, all **24 x 7 x 365**.
- RCM companies that use ADS' EHR and PM systems **help ensure their clients remain their clients!**
- **The MedicsRIS and the MedicsDocAssistant EHR are excellent for RCM companies with radiology clients in need of RIS** and MedicsDocAssistant is excellent for helping **radiologists obtain their Stimulus Act incentives** as well. MedicsRIS can also be interfaced with a myriad of **PACS**.

- Our **Medics e-Rx** capability will work with the MedicsPremier PM system without having to use the MedicsDocAssistant EHR. This is excellent for any RCM company's clients who are not yet ready for the full MedicsDocAssistant EHR, but who do want an e-Rx solution now.
- MedicsDocAssistant EHR / MedicsPremier PM / MedicsRIS are available as **Client Server or ASP**.
- ADS has performed hundreds of **data conversions from existing PM systems, and interfaces to other systems**.

- ADS provides **quick Implementation, comprehensive Training and excellent ongoing U.S.-based Support** which includes **Updates**.
- ADS is a **Healthcare Billing and Management Association (HBMA) Corporate Member**.

Add to these features and highlights the fact that ADS has a proven, **30+ year history of stability and reliability in the industry...** that the company's **name has never changed**, that **ownership remains constant**, and that **ADS clients have never been told their system is scheduled to be "sunsetted."** In fact, almost 500 ADS clients still use their original ADS billing systems *which ADS continues to support and update!*

These are **especially important elements for RCM companies to consider**, *since your own credibility with your clients is essential to you*. With our pedigree in the industry, our Medics Solutions Suite, and our services, it is no wonder why so many RCM companies rely on systems from ADS to handle their clients' practice management / billing and EHR needs.

Contact ADS at **800-899-4237, Extension 2264** or by emailing **info@adsc.com** to schedule a personalized system overview, or to learn more about how our Medics Solutions Suite can provide the highest levels of automation solutions to your RCM company.

See how our systems can help streamline and efficiently manage your RCM company, and in the process, your clients' practices!
