

## ADS Customer Profile: Regional Radiology

Regional Radiology (RR) is a high volume, multi-faceted practice serving patients from across the entire NYC metropolitan area and surrounding NJ vicinity.

The practice, which is an ACR-accredited facility, provides a wide range of radiology services to tens of thousands of patients annually from its three office locations, and from Richmond University Medical Center.

RR has been utilizing automation solutions from Advanced Data Systems since 1995. Today, those solutions include MedicsPremier and MedicsRIS for:

- Comprehensive Radiology Practice Management
- Multi-modality / Multi-location Radiology Scheduling
- Radiology Business and Financial Reporting
- Radiology EDI for Electronic Claims, Electronic Remittance, Eligibility, Claim Status and Patient Statements
- Radiology Workflow
- NYS Workers Compensation and No-fault Billing

RR also uses the MedicsDocAssistant EHR for Radiology and has attested for their Meaningful Use incentives.

The entire Medics Suite operates as a single, unified system.

Terry Dolan, RR's Administrator, summed up their relationship with ADS by saying, "We have been an ADS client for over nineteen years which pretty much says it all. This is especially true in an industry when no one seems to be anyone's client for more than a couple of years before the vendor disappears or changes its name. If you are looking for stability in a vendor coupled with excellent radiology software and support services, then you need to call ADS."

### Services Performed

#### Radiation Oncology:

- Tomotherapy
- PET/ CT Simulation
- 4-Dimensional R-T
- 3D-Conformal Radiotherapy
- Intensity-Modulated Radiation Therapy
- Stereotactic Radiosurgery
