Orthopedic MedicsCloud Suite™

INTRODUCING ADVANCED REVENUE CYCLE MANAGEMENT

The MedicsCloud Suite for Orthopedics delivers an all-encompassing solution that seamlessly blends financial management, billing processes, operational workflows, and electronic health records (EHR) for thorough clinical charting and Orthopedics-specific reporting.

Designed with precision, this Suite enhances practice efficiency and drives improved financial results.

1. Streamlined Orthopedic Documentation: Our MedicsCloud Suite™ offers expanded documentation templates, precisely tailored for orthopedic specialties. This suite enhances the ability to document comprehensive patient encounters, ensuring the capture of vital orthopedic-specific information such as joint assessments, postoperative progress, and long-term rehabilitation plans with precision and ease.

2. Advanced Integration for Increased Efficiency: The integration of FlowText technology with Dragon Medical One into our MedicsCloud EMR has revolutionized the way practitioners manage patient charts. This innovative voice-to-text technology allows for efficient navigation and documentation, providing a more interactive and patient-focused experience.

3. Billing and Coding Precision: It is now possible with advanced orthopedic billing capabilities, with Superbills that feature the latest ICD and CPT codes for orthopedic procedures and diagnoses. This ensures that billing is accurate, comprehensive, and fully optimized for the highest possible reimbursement rates.

4. Claim Success Rate Optimization: We are proud to offer our MedicsPremier Practice Management with a claim success rate that approaches 100% on first-attempt submissions to clearinghouses. Our system is finely tuned to manage a variety of claims, from HCFA to workers' compensation, ensuring that your practice stays financially healthy and compliant with billing regulations.

5. Comprehensive RCM Services: Our RCM services now feature dynamic real-time claim tracking, giving you full visibility from claim submission to payment. This powerful feature expedites the reimbursement process, allowing for quicker identification and resolution of any issues that may arise. Our intelligent submissions and user-friendly interface are designed to further enhance the efficiency and effectiveness of your practice's RCM process.

6. Unified Support for Orthopedic Subspecialties: Recognizing the diverse needs of orthopedic care, our MedicsCloud EMR supports a wide range of subspecialties. Whether it's managing multiple sclerosis with PT and OT or providing pain management treatments, our system delivers comprehensive care coordination within one unified platform.

6. Enhanced Data Management for Comprehensive Care: Our intelligent data retrieval feature allows for quick access to historical data and seamless attachment of diagnostic images, lab results, and more, ensuring a holistic view of the patient's medical history.

By bringing together the enhancements into MedicsCloud Suite™, we reaffirm our commitment to providing an all-encompassing solution that simplifies clinical workflows, ensures compliance, and revolutionizes your orthopedic practice's revenue cycle management.

We are dedicated to your practice's growth and efficiency and look forward to helping you enhance patient care and optimize your financial outcomes. Explore MedicsCloud Suite™ and witness firsthand how our solutions can transform your orthopedic practice into a more efficient and financially robust operation.

MedicsRCM offers personalized, transparent, boutique-level excellence in Orthopedics Medical Billing Services. From managing HCFA, UB, WC, and NF claims to attorney management, hands-free charting, transcribing, PACS interfacing, and even tracking marketing campaigns and purchasable products—it's a comprehensive solution. With 100% transparent, on-demand access to all your data, you have full control and can perform functions as needed.

R E V E N U E
