

FOCUS ON Orthopedics

We are delighted to announce the latest enhancements to our **Orthopedic Electronic Medical Records (EMR)** system, designed to streamline your orthopedic practice's operations with cutting-edge technology.

Here are some key features of our updated Orthopedic EMR :

- 1. Orthopedic-Specific Documentation Templates:**
Coding and Billing Support: Accurate coding and billing are crucial for the success of your Podiatry practice. Our Podiatry EMR includes ICD Superbills, CPT Superbills, LAB Superbills, and Radiology Superbills tailored specifically to Podiatry procedures and diagnoses. These Superbills provide you with relevant codes, ensuring proper billing and reimbursement for your services.
- 2. FlowText Technology with Dragon Medical One Integration:** We have integrated FlowText technology, a state-of-the-art solution in collaboration with Dragon Medical One, to deliver a unique click-free charting experience. This powerful combination allows you to navigate and populate charts quickly using voice commands, significantly reducing the time spent on documentation. This feature seamlessly merges with our Ortho-specific templating, enabling you to personalize and expedite the charting process while maintaining a high level of detail and personalization for each patient encounter.
- 3. Subspecialty and Associated Disciplines Support:**
Understanding the intricate nature of orthopedic care, our EMR is equipped to support a range of subspecialties and associated disciplines, including Physical Therapy (PT), Occupational Therapy (OT), Pain Management, Chiropractic (Chiro) care, and Acupuncture. This integrated approach ensures a harmonious and comprehensive care delivery system for patients within the orthopedic continuum.
- 4. Intelligent Data Retrieval and Attachment:** Leveraging our intelligent review mechanism, you can swiftly pull information from past encounters to streamline your clinical assessments. The system simplifies attaching diagnostic images, lab results, and other critical files directly to the patient's record, maintaining an all-encompassing patient profile.
- 5. Customized Coding and Billing for Orthopedics:** Our EMR is engineered to support the intricate billing requirements of orthopedic practices with specialized Superbills, encompassing ICD, CPT, LAB, and Radiology codes pertinent to orthopedic services. This facilitates accurate and efficient billing, thus ensuring optimal reimbursement rates and compliance with billing regulations.
- 6. Real-Time Claim Tracking and Management:** Keep a vigilant eye on your claims process with our real-time tracking feature, which allows you to follow the journey of your claims from submission to final payment. Our system is designed to identify any hiccups promptly, aiding in swift resolution and contributing to a healthy revenue cycle.

We remain steadfast in our dedication to continuously innovate our Orthopedic EMR and practice management solutions. The latest updates are a testament to our commitment to providing tools that not only simplify clinical and administrative tasks but also enhance the quality of patient care and financial outcomes of your practice.
